

DIZZY

"Dizzy Gillespie's trumpet was the clearest, most accurate and pliant trumpet ever blown in the history of jazz. Every phrase he played was perfect."

It took years to design a loudspeaker worthy of the name "Dizzy". It had to be quick, pliant, clear and balanced. Any good amplifier no matter if tube or solid state technology, will bring perfect results. With Dizzy, its owner should be able to close the book on "Loudspeakers". The greatest challenge for us was to build a speaker for all music lovers, not just a toy for millionaires. Not one screw is luxury, no millimeter of cabinet to much. We optimized our concept of the controlled float of energy. We have reduced this loudspeaker to the essential. We leave only the music.....

DIZZY

Floor standing speaker

Features

2-Way vented system
Optimized AIM (acoustic impedance matching)
Socket constructed of three different perfectly harmonized materials
Very rigid corpus, built of our special manufactured sandwich panels
Seven layered lacquer finish
Front made of original Corian®/MDF Sandwich, sanded by hand
Internal standing wave deflectors
Cardas SE9 internal wire
Cardas pure copper terminals
Crossover handcrafted by Mundorf Germany, high grade components

Drive units

1 x 6,5" Aluminum cone, anodized close to ceramication of the surface, phase plug
1 x 1" ring radiator, neodymium magnet system, encapsulated rear chamber, mounted heat sink

Frequency response

33 Hz to 40 kHz ($f_{-6\text{dB}}$)

Sensitivity

88 dB (2,83V/1m)

Impedance

8 Ω (minimum 3,8 Ω)

Dimensions

Height 940 mm
Width 250 mm (with socket)
Depth 450 mm (with socket)

Weight

27 kg

Finishes

Body Walnut nature
Walnut blazed
Walnut mocca
Others on request
Front Corian® black
