

ELLA

*"Ella Fitzgerald was truly the "First Lady of Song"! The clarity of her voice was just as legendary as her massive three-octave voice volume. Whoever listened to the amazing duets with Louis Armstrong on the Porgy and Bess knows how well she managed to touch our hearts and souls with devotion, passion and warmth."*

Our ELLA is a deep bow we take before the miraculous Ella Fitzgerald. True purity ranging from the darkest depths to the most brilliant heights are only the corner posts of an integral and deep music experience.

The sophisticated and sumptuously designed body has a crucial bearing on ELLA'S differentiated and well-balanced sound characteristics. The front, which is covered with the finest leather that, normally, can only be found in the world's high-class automobiles, is not only for good looks, but also serves a purpose in the overall musical experience.

The six layered sandwich panels of the body, the refined ring radiator with it's specially designed machined and anodized aluminum faceplate, the customized ceramic diaphragm, multiple implementations of the golden ratio - all of our efforts bent on the creation of a homogenous, highly musical fidelity to the experience and emotion of ELLA.
